The only problem I have is when I go to attack other players with these bombs, my extra spin disappears. I thought it was just a glitch but it's not right. I've lost a lot of rotation in the last two weeks. There is a way to solve it. Ananali this game is enjoying a lot overall. I'm actually able to play for a while without actually spending actual cash towards it. The biggest complaint invites as I have not found these rewards though I got others to add from text and Facebook... It's not fair that it's not working and I hope the developers see it, address it, and reward accordingly. Also features and graphics are decent. I have not experienced any flexibility on the game. The last problem I have is that it can be very easy to kill one of the offers that spends money but I buy it completely so I am able to cancel it before. Well so the game is completely fun and yes addiccing but for the month now and yes I mean I have not received any new puzzle pieces so nothing has come more than discomfort in getting the bosom. Also on the 4th grid you think you are doing well and no matter what square you get: 10 and all the coins go away, once in a while bad luck that is being cheated every once in a while. These are things that should be decided later and soon. If it's not for these problems it will be a 5 for 5 stars... I actually given it to 3.
